

Table of Contents

	Page
1. Purpose.....	1
2. DARPA.....	1
2.1. Mission, Management, and Organization	1
2.2. DARPA’s Role.....	3
2.3. Shaping Programs	6
2.4. Major Accomplishments	7
2.5. Future Icons	9
2.6. Transitioning Technologies	10
3. Current Strategic Thrusts.....	13
3.1. Robust, Secure, Self-Forming Networks	13
3.2. Detection, Precision ID, Tracking, and Destruction of Elusive Targets.....	18
3.3. Urban Area Operations	20
3.4. Advanced Manned and Unmanned Systems.....	23
3.5. Detection, Characterization, and Assessment of Underground Structures	26
3.6. Space	27
3.7. Increasing the Tooth to Tail Ratio	29
3.8. Bio-Revolution.....	34
3.9. Core Technologies	36
3.9.1. Quantum Science and Technology	36
3.9.2. Bio-Info-Micro.....	36
3.9.3. Materials	37
3.9.4. Power and Energy.....	38
3.9.5. Microsystems	39
3.9.6. Information Technology	40
3.9.7. Mathematics	41
3.9.8. Manufacturing Science and Technology	41
3.9.9. Lasers	42
4. Strategy and Programs in Context.....	43
4.1. Strategic Thrusts Supporting Quadrennial Defense Review Priorities.....	43
4.2. Programs and Budget Supporting DARPA’s Strategic Thrusts	43
5. Additional Information	45
5.1. General.....	45
5.2. Special Assistant for Technology Transition.....	45
5.3. DARPA Operational Liaisons and Representatives	45

List of Figures

	Page
Figure 1: DARPA’s organization.....	2
Figure 2: Timelines and investments in science and technology.....	3
Figure 3: DARPA’s role in science and technology.....	4
Figure 4: DARPA’s Basic Research funding.....	4
Figure 5: Total S&T funding in DoD and DARPA.....	4
Figure 6: DARPA’s senior leadership and technical program managers have visited numerous military bases, commands, training centers, and other Defense facilities.....	7
Figure 7: Key DARPA accomplishments spanning more than four decades.....	8
Figure 8: DARPA transition methods.....	10
Figure 9: Bridging the Network-Centric Operations gap between strategic/operational and tactical levels of deployment and warfare.....	14
Figure 10: Small Unit Operations Situational Awareness System (SUO SAS).....	14
Figure 11: FCS-C Gateway enables network interoperability.....	15
Figure 12: XG Communications program.....	16
Figure 13: Optical and Radio Frequency Combined Link Experiment provides links to forces fixed and on-the-move.....	16
Figure 14: Dynamic Multi-Terabit Core Optical Networks: Architecture, Protocols, Control and Management.....	17
Figure 15: Chip-Scale Atomic Clock: ultra-miniaturized, low-power, atomic time and frequency reference units.....	17
Figure 16: DARPA’s goal: eliminate barriers between Intelligence (J-2) and Operations (J-3).....	18
Figure 17: Networked operations.....	19
Figure 18: A composite image of a tank under trees formed from observations by a ladar sensor.....	20
Figure 19: Decision aids help manage and adjust sensor routes to cover moving targets.....	20
Figure 20: Wasp micro air vehicle.....	21
Figure 21: Command Post of the Future.....	22
Figure 22: Warfighters in a DARPA Training Superiority program classroom.....	23
Figure 23: Unmanned Vehicles – the increasing challenge of autonomy.....	24
Figure 24: A-160 vertical take-off and landing (VTOL) unmanned air vehicle (UAV).....	24
Figure 25: The winner, 2005 DARPA Grand Challenge – Stanford’s Stanley (6h 53m – 19.2 mph).....	25
Figure 26: Cave entrance.....	26
Figure 27: Underground facility.....	26
Figure 28: DARPA’s space thrust.....	27
Figure 29: Falcon program’s Hypersonic Cruise Vehicle.....	28
Figure 30: Falcon Small Launch Vehicle (SpaceX’s Falcon I) to be launched from Kwajalein Atoll, Marshall Islands.....	28
Figure 31: Major themes supporting enhanced decision-making.....	30
Figure 32: Personalized Assistant that Learns (PAL).....	32
Figure 33: HPCS accomplishments, plans, and performance objectives.....	33
Figure 34: Global Autonomous Language Exploitation.....	33
Figure 35: Bio-inspired “Big Dog” quadruped robot is being developed as a “mule” that can traverse difficult terrain.....	34
Figure 36: Exoskeleton.....	38
Figure 37: Schematic of 3-D circuit employing advanced functionality in each layer and reducing the length of critical signal paths.....	40
Figure 38: DARPA’s Strategic Thrusts and 2006 QDR Priorities.....	43
Figure 39: DARPA’s Strategic Thrusts, the principal offices supporting those thrusts, and the Program Element and Project numbers in the Descriptive Summaries for FY 2007.....	44
