Cover

Saab's RBS15 ('nuff said). (Photo: Saab)

Small inserts on cover depict: As armed forces around the world consider the next-generation of small arms solutions best suited to the conduct of offensive and defensive missions across the future operating environment, industry continues to offer up alternative solutions to enhance lethality and mobility on the battlefield (Photo: B.E. Meyers); the M4 CARL GUSTAF is a multi-role, shoulder-fired weapon developed for deployment for urban combat (Photo: Saab); and increasing tensions with unpredictable North Korea is forcing South Korea to spend more on the technical modernisation of its armed forces and on structural changes (Photo: ROK Mod).

Small insert in contents shows view out the cargobay of the Embraer KC-390. (Photo: Mönch/DPM)
