

Table of Contents

Foreword	v
Abstracts for Appendices F–J	vii
Appendix F: Architecture and Information Management (AIM)	F-1
1.0 Introduction.....	F-1
1.1 Information Management Architecture Vision	F-2
1.2 Major Conclusions and Recommendations.....	F-2
1.3 Architecture and Information Management Panel Membership	F-6
2.0 Aerospace Force Structure and Architectural Approach	F-6
3.0 Information Management Philosophy	F-12
3.1 Information Management in the Military Environment	F-12
3.2 Information Management Concept.....	F-14
3.3 Information Management Vision	F-15
3.4 Employment of Aerospace Power.....	F-16
4.0 Information Management Structure.....	F-17
4.1 Communications—The Vision.....	F-17
4.2 Global Grid.....	F-18
4.3 Defense Information Infrastructure Common Operating Environment	F-23
4.4 The Global Grid and the COP	F-24
4.5 Global Grid Network Management.....	F-26
4.6 Information Assurance	F-26
5.0 Vision for Air Force Information Management.....	F-27
5.1 Introduction and Context.....	F-27
5.2 Military Considerations for Determining When the Military Should Conduct Activities ..	F-30
5.3 Characteristics and Attributes of Effective Future Information Architectures.....	F-33
5.4 Military Strengths From Robust Information Management.....	F-34
5.5 Conclusions	F-36
6.0 Technology Enablers	F-37
6.1 Introduction	F-37
6.2 Attributes of Future Air Force Information Management.....	F-38
6.3 Technology Challenges for Future Air Force Information Management.....	F-41
6.4 Enabling Commercial Space Capabilities	F-43
6.5 Enabling Collaborative Technology Development	F-46
6.6 Enabling Regulatory Activities	F-48
6.7 Conclusions and Recommendations.....	F-51
7.0 Migration Strategy	F-52
7.1 Introduction	F-52
7.2 Assumptions and Assessments.....	F-52
7.3 Approach to the Problem.....	F-54
7.4 Migration Plan.....	F-54
7.5 Technology Roadmap	F-55
7.6 Conclusion.....	F-55
8.0 Acquisition Strategy	F-55
8.1 Acquisition Reform to Accept New Commercial Business Cases.....	F-55
Annex 1 to Appendix F: AIM Panel Meetings	F-59
Annex 2 to Appendix F: Acronyms and Abbreviations.....	F-61

Appendix G: Payloads	G-1
1.0 Introduction.....	G-1
1.1 Payloads Panel Membership	G-2
2.0 Space-Based Radar	G-3
2.1 Scope and Content.....	G-3
2.2 Structure	G-3
2.3 SBR Modes of Operation	G-3
2.4 SBR Concepts of Operations.....	G-6
2.5 SBR System Architectures	G-7
2.6 SBR Satellite Critical Technologies.....	G-10
2.7 SBR Systems, Demonstrations, and Studies	G-12
2.8 Conclusions and Recommendations.....	G-15
3.0 Communications	G-17
3.1 Summary	G-17
3.2 Introduction	G-18
3.3 General Trends in Communications Satellites	G-20
3.4 Wideband Communications	G-25
3.5 Narrowband (Mobile) Communications	G-27
3.6 Protected and Survivable Communications	G-30
3.7 DoD Space-Based Networks Using Commercial Satellites and Modified Commercial Buses.....	G-32
3.8 Technology Considerations.....	G-34
4.0 Navigation, Position, and Timing	G-39
4.1 Introduction	G-39
4.2 References	G-40
4.3 Principles of Operation.....	G-40
4.4 Codes, Frequencies, and Bandwidths.....	G-41
4.5 Combat Operations and Electronic Countermeasures	G-41
4.6 Payload Acquisition and Launches	G-42
4.7 Management	G-43
4.8 Improvements in Timing—Application to Spacecraft and Payloads	G-43
4.9 Research and Development for GPS: Countermeasures and Counter-Countermeasures...G-43	
4.10 Recommendations	G-44
5.0 Space-Based Electro-Optical (EO) (Visible/Infrared) Systems.....	G-44
5.1 Introduction	G-44
5.2 Space-Based EO/IR Passive Sensing	G-44
5.3 Space-Based EO/IR Active Sensing.....	G-49
5.4 Recommendations	G-53
5.5 Optical Systems, Including Deployable Optics and Relay Mirrors	G-53
5.6 Space-Based Laser Weapons	G-56
5.7 Recommendations	G-62
6.0 System Architecture and Integration Issues.....	G-63
6.1 Introduction	G-63
6.2 Confluence of External Forces	G-64
6.3 Steps to Future Systems Interoperability.....	G-67
6.4 Enabling Systems Access.....	G-69
6.5 Common Modular Architectures.....	G-70
6.6 Recommendations	G-71
6.7 Some Areas of Caution	G-75
7.0 Roles for Small Satellites.....	G-76
7.1 Doing Existing Missions With Smaller Satellites	G-76

7.2	New Applications Enabled by Small Satellites	G-78
7.3	Technology Enablers for Small Satellite Missions	G-84
7.4	Mission-Specific Tailorship	G-88
7.5	Accommodation for Secondary Payloads	G-90
7.6	Balance of Launch Cost Reduction and Spacecraft Miniaturization.....	G-94
8.0	RADSAR—A Novel All-Weather Passive Surveillance Technology.....	G-96
9.0	Space Power Technologies	G-98
9.1	Electrical Power Systems	G-98
9.2	Emerging Technologies.....	G-98
	Annex to Appendix G: Acronyms and Abbreviations.....	G-101
	Appendix H: Vehicles and Lift	H-1
1.0	Charter Summary.....	H-1
1.1	Vehicles and Lift Panel Membership	H-1
2.0	Summary Findings and Recommendations	H-2
2.1	Launch Vehicles.....	H-2
2.2	Launch Infrastructure	H-3
2.3	Concept—Aerospace Operations Vehicle System	H-3
2.4	Spacecraft Buses	H-4
2.5	High-Leverage Techniques and Technologies	H-4
3.0	Expendable Launch Vehicles.....	H-4
3.1	Background—Definitions and History.....	H-4
3.2	Cost Goals and System Improvements.....	H-6
3.3	Technologies to Support Reduced ELV Cost.....	H-6
3.4	The Evolved Expendable Launch Vehicle Program	H-7
3.5	Recommendations	H-8
4.0	Launch Infrastructure.....	H-8
4.1	Background	H-9
4.2	Range Functions.....	H-9
4.3	Range Concerns.....	H-11
4.4	Solution Options.....	H-13
4.5	General Observations	H-17
4.6	Conclusions	H-17
4.7	Recommendations	H-17
5.0	Reusable Space Launch Vehicles	H-18
5.1	The Case for Reusable Launch Vehicles.....	H-18
5.2	Entrepreneurial Approaches to Reusable Launch Vehicles	H-19
5.3	NASA Approach for Reusable Launch Vehicles	H-20
5.4	Conclusions	H-22
5.5	Recommendation.....	H-22
6.0	Aerospace Operations Vehicle System.....	H-23
6.1	Missions and Requirements	H-23
6.2	AOV System Approaches	H-23
6.3	Space Maneuvering Vehicle Demonstrator.....	H-24
6.4	AOV Program Plan	H-25
6.5	Conclusions	H-26
6.6	Recommendations	H-26
7.0	Spacecraft Buses	H-26
7.1	Overview	H-26
7.2	Bus Acquisition Concepts	H-29
7.3	Radiation Hardening	H-29

7.4	Technology Needs of Buses.....	H-30
7.5	Recommendations	H-32
8.0	High-Leverage Technologies for Air Force Investment.....	H-33
8.1	Materials and Manufacturing	H-33
8.2	Propulsion Systems	H-35
8.3	Tethered Orbital Accumulator.....	H-37
8.4	Optical Systems and Sensors.....	H-38
8.5	Distributed Systems Management.....	H-39
8.6	Concluding Remarks	H-41
8.7	Summary of High-Payoff Areas.....	H-41
	Annex to Appendix H: Acronyms and Abbreviations.....	H-43
	Appendix I: Terrestrial Segment.....	I-1
1.0	Introduction.....	I-1
1.1	Scope and Content.....	I-1
1.2	Structure of the Appendix	I-2
1.3	Terrestrial Segment Panel Membership	I-3
2.0	Commercial Practices for Satellite Operations.....	I-4
2.1	Introduction	I-4
2.2	Comparison of the Air Force and a Modern Commercial System	I-4
2.3	Key Lessons Learned	I-8
2.4	Recommendations	I-8
3.0	Mission-Centric Distributed Architecture.....	I-9
3.1	Introduction.....	I-9
3.2	Benefits of Mission-Centric Architecture.....	I-10
3.3	Notional System-of-Systems Interconnect Model	I-13
3.4	Illustrative MCDA Implementation.....	I-19
3.5	Evolving Programs and Technology.....	I-21
3.6	Rethinking Organizational Roles	I-22
3.7	Recommendations.....	I-23
4.0	Connectivity for the Network-Centric Battlespace.....	I-23
4.1	Introduction.....	I-23
4.2	Communication Systems.....	I-25
4.3	Gateways to Legacy Systems	I-30
4.4	Recommendations	I-32
5.0	Spiral Development: Moving to Best Commercial Practices	I-33
5.1	Introduction	I-33
5.2	Spiral Development.....	I-34
5.3	Spiral Development Applicability.....	I-36
5.4	Recommendations	I-37
6.0	Human Factors.....	I-37
6.1	Introduction and Problem Definition	I-37
6.2	Human Performance Metrics.....	I-40
6.3	Human Factors in the Acquisition Process.....	I-42
6.4	Cost-Effective Use of Simulation.....	I-44
6.5	Human Factors Awareness.....	I-45
6.6	Recommendations	I-47
7.0	Conclusions and Recommendations	I-49
	Annex to Appendix I: Acronyms and Abbreviations	I-51

Appendix J: Cost and Acquisition Strategy	J-1
1.0 Executive Summary	J-1
1.1 Introduction	J-2
1.2 Cost and Acquisition Strategy Panel Membership	J-2
1.3 Cost and Acquisition Strategy Panel Charter	J-3
1.4 Structure of the Appendix	J-3
2.0 Cost Estimation Methodology	J-4
2.1 Introduction	J-4
2.2 Cost-Estimating Architecture	J-4
2.3 ACEIT Model	J-5
2.4 Risk Methodology	J-6
2.5 Default Conditions and Assumptions	J-11
3.0 Cost Data	J-14
3.1 Introduction	J-14
3.2 Baseline	J-15
3.3 Baseline Plus	J-16
3.4 Aggressive Reductions	J-17
3.5 Moderate Reductions	J-18
4.0 Cost Panel Recommendations	J-19
5.0 Acquisition Findings	J-20
5.1 Consider Commercial Systems to Meet Military Needs: Lease versus Buy versus Fee for Service	J-20
5.2 Piggybacking	J-21
5.3 Partnering With Other Agencies and With Industry	J-21
5.4 Space Application Trades	J-22
6.0 Acquisition Recommendations	J-23
6.1 Marketplace Office	J-23
6.2 Commercial Default	J-23
6.3 Commercial Advocate	J-24
6.4 Partnering	J-25
6.5 Contingency Commercial Capabilities	J-25
6.6 Develop Innovative Rapid Acquisition Process	J-26
6.7 Air Force Planning Process Outyear Realism	J-27
6.8 Revolutionary Approach to Requirements	J-27
Annex 1 to Appendix J: Tecolote Cost-Estimating Support	J-29
Annex 2 to Appendix J: List of Acronyms and Abbreviations	J-75
Annex A to Volume 3: Executive Summary	Annex A-1
Annex B to Volume 3: Terms of Reference	Annex B-1
Annex C to Volume 3: Initial Distribution	Annex C-1
